

## PROPOSAL

### NOTIS QUIKREPORTS FOR DALNET

#### PROPOSAL

DALNET should make plans to license the NOTIS QuikReports package, expected to be available in 1993.

#### RATIONALE

NOTIS will deliver a package of statistical and management reports covering some of these areas:

1. General, including ARL statistics
2. Acquisitions, including fund accounting
3. Circulation
4. Cataloging
5. Serials
6. Online catalog
7. Collection management

The optional maintenance plan will provide all reports added to the package later.

DALNET libraries have prioritized lists of reports to be developed by our programmer/analysts using the SAS report writer programs. These reports take considerable time to develop and maintain. SAS is a cpu-intensive program to run. These locally developed programs must be reviewed and enhanced, as needed, with each new NOTIS release and with each new SAS release.

DALNET would benefit from having as many report programs as possible provided and maintained by NOTIS. DALNET needs to plan now to include the NOTIS QuikReports package in a future budget or to raise funds separately to obtain the license.

#### COSTS

The price for QuikReports, including the first year in maintenance, is:

\$29,750 if purchased before Sept. 30, 1992,  
or \$35,000 if purchased after.

Maintenance for the second year is 15% of the purchase price, or \$4,463/5,250. These prices were quoted by Gene Adams, our NOTIS marketing representative.
