Subject: Report on Dental Hygiene Graduates

In support of your effort to prepare for the Dental Hygiene accreditation visit, the Office of Institutional Research has prepared the attached report. Specifically, this report depicts the opinions and experiences of Dental Hygiene graduates over the past ten years. All of the information presented in this report was derived from the Graduate Follow-Up Survey that is implemented by the Institutional Research Office.

Highlights from this report include:

- The number of program graduates has remained constant over the past ten years.
- The average number of years for a graduate to receive their degree has increased, especially in recent years.
- In terms of employment, there has been a dramatic shift away from full-time employment towards part-time employment.
- The vast majority of graduates are employed in jobs that are highly related to Dental Hygiene.
- The average salary of full-time employed graduates generally has increased over the past ten years. A similar trend in average salary among part-time employed graduates is also evident.
- Generally, graduates have a positive impression of the relevance of their OCC educational experience.
- The vast majority of graduates have not continued their education (transferred) at a four year university.
- If given the opportunity to start over again, the majority of graduates would still attend OCC as well as choose the Dental Hygiene program.

I trust that this information will be of assistance to you as you prepare for the accreditation visit. Please do not hesitate to contact me if you have any questions.
