Degree Trends Report
Emergency Services Technology
EST
2002-03

Prepared by:
Oakland Community College
Office of Institutional Research
May 4, 2004

**Oakland Community College
Degree Trends Report
Emergency Services Technology (EST)
1993-94 through 2002-03**

The Degree Trends Report is developed by the Office of Institutional Research based on data compiled from official college records which are submitted to the State of Michigan for the IPEDS (Integrated Post-Secondary Education System) Annual Degrees Conferred Report. The Degree Trends Report examines trends of OCC degrees, based on specific programs. The standard format offers information about certificates and associate degrees awarded. In the event that a given program offers only a certificate or an associate degree, information describing the other type of award will not be shown.

Trends over a specified period of time are illustrated by the following graphs for Emergency Services Technology (EST)

- Ten-year trend showing the annual awards conferred in Emergency Services Technology
- Rate of change in annual awards conferred in Emergency Services Technology
- The three-year Moving Mean for annual awards conferred in Emergency Services Technology
- Ten-year trend in awards conferred collegewide.

Questions regarding this report can be forwarded to the Office of Institutional Research at (248) 341-2123.

**Oakland Community College
Credit Hour Trends Report
Emergency Med Tech
1993-94 through 2002-03**

Each year the Office of Institutional Research prepares the Credit Hour Trends Report, based on data submitted to the State of Michigan in the annual ACS-6 (Activities Classification Structure) process. This report is based on each course section's official count date (1/10th Day). The Credit Hour Trends Report examines annual (July 1 - June 30) enrollment trends of OCC disciplines, based on course prefix codes.

Trends over a specified period of time are illustrated by the following graphs for Emergency Med Tech.

- Graph depicting ten-year trend in student credit hours generated by Emergency Med Tech
- Graphs depicting three-year moving mean and rate of change in student credit hours for Emergency Med Tech.
- Ten-year trend in annual credit hours generated Collegewide.

Questions regarding this report can be forwarded to the Office of Institutional Research at (248) 341-2123.

CURRICULUM
REVIEW
COMMITTEE

**CURRICULUM REVIEW SELF-STUDY
Recommendations**

Program/Discipline: EMT (Emergency Medical Technology) Coordinator(s): Denise Martin

Review Date: June 18, 2004

Today's Date: October 11, 2004

In an effort to provide meaningful feedback to the program coordinator and related faculty, specific recommendations resulting from your program/discipline Curriculum Review are as follows:

**Emergency Medical Technology (EMT) – presented by Denise Martin
Review Recommendations: (Review –June 18, 2004)**

- Continue to update syllabi as necessary. The syllabi template is on the P drive.
- The request for a brochure needs to be addressed with the dean over EMT who will work with publications.
- Career services are available in the Counseling Career Center for students needing to have a resume prepared and/or review of the interviewing process.
- Work with the Curriculum Committee to revise and update the catalogue descriptions.
- The committee supports the development of the online EMT courses. For development of the MED 1103 online course, the committee recommends working with the full-time faculty of Allied Health as they too use this course as part of their degree requirements.
- Request for positions need to be discussed with the dean.

In order to continue refining the process of Curriculum Review, the committee would appreciate an update on your process regarding the above recommendations by the end of Fall 2004 semester, and any suggestions regarding the review process.

CRC Review Follow-up
Approved College Academic and Student Services Council (CASSC)
November 12, 2002

The review for EMT was very thorough and presented a vision of a strong program. CRC supports your continued success in curriculum development and program growth.

Respectfully submitted,

Gail A. Mays
Chair of the Curriculum Review Committee

CURRICULUM REVIEW OF EMERGENCY MEDICAL TECHNOLOGY

The OCC EMS training programs are extremely dynamic educational programs. Protocols and procedures change frequently and administrators and instructors must stay on top of national, state, and even local standards in order to provide the most accurate information to students. There are some consistencies with nursing and other medical programs due to them being governed by the same state agencies, however, providing pre-hospital care poses some unique challenges as the situations EMS personnel encounter are extremely unstable. As part of their training, our students are also exposed to these situations and must be adequately trained in order to protect their wellbeing and protect the college from liability. Instability and danger is also present in the police and fire service, however, communicable diseases and the constant threat of coming into contact with contaminated bodily fluids is not as prevalent unless these agencies are also involved in emergency medical care. Another difference that sets EMS training apart from police and fire is the requirement for instructors to maintain two licenses and many certifications in order to be approved to teach in the EMS field. We provide four levels of EMS training to prepare students for these areas of licensure: Medical First Responder, Basic EMT, EMT-Intermediate, and paramedic. The OCC EMT program staff not only possesses instructors meeting all necessary requirements of the state, but we pride ourselves in hiring and retaining only the highest quality EMS instructors. Our reputation speaks for itself when we are contacted for information on our program because "I heard that you have the best EMS program in the area."

Our dedication to high quality is also evidenced by the National Registry examination results that consistently reflect higher averages than the state. The most recent data has the OCC Medical First Responder pass rate at 82% compared to 78% nationally (no state results given) and our Basic EMT pass rate is 72% compared to the state's 71% and 66% nationally. Our paramedics have pass rates at 58% for the written exam compared to 49% for the state and 44% nationally on the written exam and the OCC candidate pass rate is 91% for the practical with the national practical average at 64%; (no OCC EMT-I results were provided). We have observed a steady increase in pass rates since the implementation of the National Registry examinations in the state of Michigan caused scores for all programs to plummet drastically. Though we also experienced a dramatic decrease in student success on the National exams, we immediately implemented changes in the program to correct inadequacies.

Some of the curriculum changes that were implemented just prior to the state mandated implementation date were done hastily and with little direction from state agencies on how to accomplish the transition from state to national curriculum. In addition, the state implemented the national examination prior to mandating the national curriculum. The major program and course revisions made in our program in 2002 were done with little input as to how programs were supposed to accomplish this transition. After a full year of implementing the changes, some revisions need to occur to improve our curriculum. These are all stated in this document.

Current Catalog Descriptions

EMT 1000

Rescue/Extrication

1 Credit

Prerequisite: Students enrolled in This course must be licensed BEMT's or higher or be currently enrolled in EMT 1551.

The course emphasizes the methods of gaining entry, freeing and removing an injured and trapped individual without causing further havoc or trauma from wreckage. The class will be taught by a state certified instructor utilizing lecture, demonstration and actual hands-on experience at a local junk yard. Students will actually use light and medium extrication tools. Upon successful completion, the student will be issued a letter of completion and state certificate. Course/lab fees.

Proposed Changes:

EMT 1000 (Change to EMT 1200 and limit practical to 16-20 students for safety reasons)

Rescue/Extrication

1 Credit

Prerequisite: Students enrolled in this course must be licensed BEMT's or higher or be currently enrolled in EMT 1551.

The course emphasizes the methods of gaining entry, freeing, and removing an injured and trapped individual from a vehicle without causing further harm. The class is taught by state certified instructors utilizing multiple methods of instruction. The second day is scheduled at an appropriate outdoor site and includes actual hands-on experience with light and medium extrication tools. Upon successful completion, the student will be issued a certificate of completion by the college. Course/lab fees.

* Coordinator: Please distribute to all faculty teaching this course.

Current Catalog Description:

EMT 1411

Basic EMT Clinical Field Experience I

1 Credit

Prerequisites: EMT 1540 and EMT 1551.

This course is designed to provide the student with hospital and ambulance skill practice. Students will acquire a working knowledge of practices and procedures in the field of emergency care, such as patient assessment, vital signs, the care and treatment of persons who are the victims of medical or traumatic emergencies. Through hands-on training, the student will complete specified performance objectives to the satisfaction of their hospital/ambulance evaluator. Course/lab fees.

Proposed Changes:

EMT 1411 (Change to EMT 1100 and limit number of students in each section for tours and scheduling)

Basic EMT Clinical Field Experience I

1 Credit

Pre- or Corequisites: EMT 1541 and EMT 1551.

This course is designed to provide the student with hospital and ambulance skill practice. Students will acquire a working knowledge of practices and procedures in the field of emergency care, such as patient assessment, vital signs, the care and treatment of persons who are the victims of medical or traumatic emergencies. Comments: _____

NUMBER OF CREDITS:	Yes	No
Appropriate:	_____	_____ <u>X</u>

Please explain any No answer: This course would be much better managed with a lower number of students per section. There should be more hands-on skill review done in class to make sure that students maintain an acceptable level of competency. The number of scheduled clinical hours could be reduced since this is a course that allows them to stay active in the field while attending the initial advanced EMT course. By doing this, the total number of credits could be cut in half and the smaller class sizes would allow for better use of time and one-on-one with students.

* Coordinator: Please distribute to all faculty teaching this course.

Current Catalog Description:

EMT 1541

Basic EMT I

5 Credits

Prerequisite: Consent of department.

Corequisite: EMT 1551.

This course will teach basic EMT knowledge as specified by the Michigan Department of Public Health. It will include but not be limited to each of the following areas: CPR, airway management, patient assessment, patient history, diagnostic signs, oxygen therapy, bandaging and anti-shock techniques. Students will be under the constant and direct supervision of a state licensed instructor/coordinator as they learn to perform each skill properly according to specific MDPH standards. Successful completion of This course requires that students pass both written and practical exams on all knowledge and skills according to state standards. Course/lab fees.

Proposed Changes:

EMT 1541 (change to EMT 1010 for 4 hour lecture course and EMT 1030 for 3 hour practical skills course for both EMT core classes limiting the number of students)

Basic EMT I

5.5 Credits (two courses: 4 hours lecture and 1.5 hours practical)

Prerequisite: Consent of department.

Corequisite: EMT 1551

This course, in conjunction with EMT 1000, 1411, and 1551, is designed to teach the knowledge, skills, and appropriate behavior to prepare students for the National Registry Certification examinations which will enable them to obtain a Michigan Basic EMT license. The focus of this particular course is related to the medical aspect of patient care. Students will be under the direct supervision of a licensed EMS Instructor-Coordinator. Successful completion of this course requires that the student pass both written and practical skill examinations consistent with State and National standards. Course/lab fees.

Comments: Course description needs to be revised. (See D. Martin's corrections.)

NUMBER OF CREDITS:	Yes	No
Appropriate:	_____	<u>X</u>

Please explain any No answer: Practical sessions of this course have too many students. The instructors have to assess each student's individual practical skills, monitor the practice of each student, and assure that they are not performing a skill incorrectly as that would cause reinforcement of the error. Practical course sessions should be a limited number of students and this course should be separate from the lecture class. We have had numerous issues with our split lecture/practical classes with staffing and payroll. These skill sessions are not "wet labs."

Current Catalog Description:

EMT 2510

Advanced EMT I Clinical

3 Credits

Prerequisites: EMT 2601, EMT 2430.

EMT specialist techniques are practiced utilizing various training aids and situational simulations. Vigorous practice in practical skills is emphasized terminating in a comprehensive practical examination. This course applies the knowledge the student has learned about airway intubation and administration of intravenous solution.

Proposed Changes:

EMT 2510 (Change to EMT 2200)

Advanced EMT I Clinical

2 Credits (limit number of students)

Prerequisites: EMT 2602.

This course is designed to provide the student with opportunities in a clinical setting within the hospital and EMS system. Focus will be on performing IV therapy and ET intubations on actual patients to obtain competency while continuing to reinforce Basic EMT skills. Specific criteria and documentation will be required in order to successfully complete this level of clinical experience. Students will be supervised and evaluated by professional personnel who will aid in the verification of competency. Course/lab fees.

ELIMINATE THIS COURSE:

EMT 2520 (Replaced with EMT 2522 and 2523)

Advanced EMT II & III Clinical

7 Credits

Prerequisites: EMT 2611, EMT 2621.

This course is designed to provide the advanced EMT student with hospital and Advanced Life Support unit skills practice. Students will acquire a working knowledge of practices and procedures in the field of advanced life support including but not limited to, patient assessment and history, cardiac monitoring, biotelemetry, ECG interpretation, defibrillating, preparing and administering medications, IV therapy, endotracheal and esophageal intubation and CPR as it relates to the AEMT. Through hands-on experiences the student will complete specific performance objectives to the satisfaction of their hospital/ALS evaluator. Course/lab fees.

Current Catalog Description:

EMT 2522

4 Credits

Advanced EMT II Clinical

Prerequisites: EMT 2612, EMT 2622 and EMT Program Director and EMT Medical Director approval.

This course is designed to provide the paramedic student with hospital and advanced life support unit experience to perform skills learned in the paramedic courses. Hospital experience will include emergency room, operating room, post-anesthesia recovery, and critical care areas for both adult and pediatric patients. In addition, students will be placed in labor and delivery, psychiatric care areas, triage, morgue, and on paramedic ambulances and fire department units. Competency of skills will be evaluated by clinical preceptors and the course instructor to assure readiness for Internship course.

Course/lab fees.

EMT 2612

5 Credits

Paramedic II Including Pharmacology

Replaces EMT 2611.

Prerequisites: BIO 1630, BIO 1640 and completion of Advanced EMT I Intermediate courses with C- or better; must hold a current Michigan Basic EMT or EMT Intermediate license; completion of EMT 1414 with C or better or provide documentation of 6 months full-time field experience; and EMT Program Director approval.

Pre- or Co-requisites: EMT 2510 (unless previously completed with C- or better); BIO 2250 (unless previously completed with C- or better).

Corequisite: EMT 2622.

The emphasis of This course is pharmacology and drug therapy as they relate to advanced pre-hospital emergency care. Aspects of drug administration such as mechanisms of action, indications, contraindications, metabolism, excretion, and side effects of a wide range of drugs will be explored. In addition, paramedic care of the medical patient including appropriate advanced level interventions will be discussed. This course is designed to provide the paramedic student with a body of knowledge and skills to assist in preparing them for the National Registry Paramedic Certification examination and enable them to assess and treat acutely ill and seriously injured patients under the control and supervision of a medical control physician. Course/lab fees.

Proposed Changes:

EMT 2612 (change to EMT 2400)

6 Credits (two courses: 4 hours lecture and 2 hours practical skills course with a limited number of students in practical class)

Paramedic II Including Pharmacology

No other changes recommended.

NUMBER OF CREDITS:	Yes	No
Appropriate:	_____	<u>X</u>

Please explain any No answer: Practical sessions of this course allow enrollment of too many students for a single instructor to adequately evaluate and test each student on each skill. Practical course sessions should be limited to fewer students and this course should be separate from the lecture class. This would also alleviate team teaching and "wet lab" stipend issues with payroll as this is not a "wet lab."

___ Yes, and should be removed from the list X No, and should remain off the list

* Coordinator: Please distribute to all faculty teaching this course.

Current Catalog Description:

EMT 2700

Advanced Cardiac Life Support-ACLS Provider

2 Credits

Advanced Cardiac Life Support-ACLS Provider

Prerequisite: Current certification in Basic Life Support (Healthcare Provider) according to AHA standards.

This course is designed to teach the essential skills of Advanced Cardiac Life Support according to current standards, but at a slower pace for students who are not involved with cardiac emergencies on a regular basis. Students are strongly encouraged to have a background in the medical, nursing, and/or paramedical fields. A basic understanding of interpreting EKG's is also encouraged. Basic Life Support, advanced airway maneuvers, defibrillation, cardioversion, cardiac pacing, pharmacological therapy, and algorithm proficiency are all components of the course. Successful completion will result in ACLS certification.

Proposed Changes:

EMT 2700 (Replace with new course: EMT 2800 National Registry Prep Course)

2 Credits (limit number of students)

The ACLS certification course should become a non-credit course due to extreme difficulty in getting the minimum number of students for a credit course to run. There is still a need in the community for this format of ACLS training but we are not accommodating the need when we cancel this course due to low enrollment. Offering it as a short course would allow us to cover cost with fewer students and still meet this need.

The paramedic students need ACLS certification in order to work in many of the area EMS services and hospitals. However, they get most of the content within their core courses and if the class is tailored to the community, much of this information is redundant. A better course to assist paramedic students in being successful on the National Registry examinations would be to develop a NR prep course to replace the ACLS course. Student could still receive ACLS certification and also focus on the other practical stations for the Registry exam. This course could also be marketed to other prospective student candidates in the community.

Current Catalog Description:

MED 1103

Medical Terminology

3 Credits

Replaces MED 1100.

Medical Terminology is intended for Allied Health students and Medical Secretarial students. This course is designed to introduce the student to the language of the health care facility. The student will gain basic understanding of the proper use of words related to medical vocabulary and become familiar with the best methods of learning the meaning of medical terminology.

Comments: Advanced Cardiac Life Support should be made a non-credit course so that it would not be a requirement to have 15 students to run. It has been offered on a non-credit basis to provide this unique course format to the community and fill a need and can run with a certain number of students to offset the cost to run. It was added to the paramedic curriculum with the upgrade to National standards but is not the right course to meet their needs. A new course should be developed to better meet the needs of students completing the advanced EMT program.

***STAFF DEVELOPMENT**

© IV

- The single full time faculty member attends all of the staff development mandated for faculty by the college and adjuncts meet their contractual requirements yearly. Discipline-Specific training is coordinated with EMT, CRJ, and PER disciplines at the Auburn Hills Campus since all of these disciplines are located primarily in the same building areas and each discipline has only one or two full time members.
- In addition to the training mandated by the college, all EMT staff must attend training mandated by the State of Michigan in order to maintain their licenses. All EMT program staff must maintain an EMS provider license (EMT, EMT-I, or paramedic) and an EMS Instructor Coordinator license. EMS ICs must get 27 continuing education credits over a three year licensing period; EMT level instructors need an additional 30 credits to maintain the Basic EMT provider license over three years; EMT-Intermediates need 36 additional credits; and paramedics must get 45 more credits over the three year period. Conferences are held twice per year in Michigan for IC professional development and at least once per year a major EMS EXPO is scheduled to obtain provider EMS continuing education credits. The adjunct faculty members have had difficulty getting this training approved for reimbursement from the college and this is reflected on many of the Individual Faculty Perceptions.
- All EMT instructors must maintain current certification over each two-year period through the American Heart Association as a CPR Instructor for Healthcare Providers. Advanced Cardiac Life Support Instructors need to also maintain the two-year certification to teach ACLS. Any other specialty certification is generally renewed on a two-year basis (PEPP, BTLS, ATLS, PHTLS, PALS, PPC, etc).

**Oakland Community College
Degree Trends Report
Emergency Med Technology (EME)
1993-94 through 2002-03**

The Degree Trends Report is developed by the Office of Institutional Research based on data compiled from official college records which are submitted to the State of Michigan for the IPEDS (Integrated Post-Secondary Education System) Annual Degrees Conferred Report. The Degree Trends Report examines trends of OCC degrees, based on specific programs. The standard format offers information about certificates and associate degrees awarded. In the event that a given program offers only a certificate or an associate degree, information describing the other type of award will not be shown.

Trends over a specified period of time are illustrated by the following graphs for Emergency Med Technology (EME)

- Ten-year trend showing the annual awards conferred in Emergency Med Technology
- Rate of change in annual awards conferred in Emergency Med Technology
- The three-year Moving Mean for annual awards conferred in Emergency Med Technology
- Ten-year trend in awards conferred collegewide.

Questions regarding this report can be forwarded to the Office of Institutional Research at (248) 341-2123.

**Oakland Community College
Credit Hour Trends Report
Emergency Med Tech
1993-94 through 2002-03**

Each year the Office of Institutional Research prepares the Credit Hour Trends Report, based on data submitted to the State of Michigan in the annual ACS-6 (Activities Classification Structure) process. This report is based on each course section's official count date (1/10th Day). The Credit Hour Trends Report examines annual (July 1 - June 30) enrollment trends of OCC disciplines, based on course prefix codes.

Trends over a specified period of time are illustrated by the following graphs for Emergency Med Tech.

- Graph depicting ten-year trend in student credit hours generated by Emergency Med Tech
- Graphs depicting three-year moving mean and rate of change in student credit hours for Emergency Med Tech.
- Ten-year trend in annual credit hours generated Collegewide.

Questions regarding this report can be forwarded to the Office of Institutional Research at (248) 341-2123.

**Oakland Community College
Credit Hour Trends Report
Law Enforcement
1993-94 through 2002-03**

Each year the Office of Institutional Research prepares the Credit Hour Trends Report, based on data submitted to the State of Michigan in the annual ACS-6 (Activities Classification Structure) process. This report is based on each course section's official count date (1/10th Day). The Credit Hour Trends Report examines annual (July 1 - June 30) enrollment trends of OCC disciplines, based on course prefix codes.

Trends over a specified period of time are illustrated by the following graphs for Law Enforcement.

- Graph depicting ten-year trend in student credit hours generated by Law Enforcement
- Graphs depicting three-year moving mean and rate of change in student credit hours for Law Enforcement.
- Ten-year trend in annual credit hours generated Collegewide.

Questions regarding this report can be forwarded to the Office of Institutional Research at (248) 341-2123.

STUDENT RECRUITMENT

© VI

The EMT staff has always made an effort to send representatives to career fairs and schools in order to promote our program. We have had some challenges in the past with the staff being spread too thin and often had to turn down an opportunity such as these to recruit potential students. We also requested the design of a brochure to promote our program and have had difficulty with other college departments in the follow through. Therefore, some alternative plans were made to try and remedy this problem. The EMT website has been a tremendous asset to students looking for information and for us to provide additional information to our existing students.

The EMT Program Director is a full-time faculty member and receives release time or a supplemental contract to run the program. The other area community colleges have a separate full time person who only coordinates and it has been a tremendous challenge to try and perform both duties well. When the previous director retired, the assistant took the Director position and the assistant position remained open. Unfortunately, what eventually occurred is that some of the duties previously performed were neglected and the program was just "maintained" on a day to day basis with no growth. A permanent employee finally filled the position of EMT/CRJ secretary position and a parapro was hired to fill a new position in EMT/CRJ, and with the addition of a Program Manager, the EMT program began to finally stabilize. This addition to the staff resulted in more phone inquiries and emails for information being returned, some of the work was divided between the Director and Manager, and what this did for the EMT program is evidenced by the fact that our student numbers doubled the past year over the previous year's numbers. We have been able to do a much better job of recruiting and retaining students by the simple fact that we have the staff to support this activity.

In the 2003/2004 academic year, the EMT program staff applied for and received Perkin's funding for recruiting and retaining non-traditional students. It was felt that there were many in the community looking for something like this program and we could do a much better job of bringing those students into our program with the financial support not only to identify and access those students, but to provide any additional assistance they may require in order to stay enrolled and be successful. The persons we attempted to target were those who may have been displaced in their jobs from layoffs or downsizing, and also single moms who might be looking for training to make them more employable (a more non-traditional type of student in an EMS program). Some of the difficulties we thought these students might encounter when considering our program were having to rearrange work schedules in order to attend classes, lost wages from reducing hours at work, childcare, financial difficulties, learning challenges, etc. There were potential solutions to some of these that we felt were more easily obtainable with a Perkin's grant. Those working within the grant spent time again visiting the schools to present our program, going to career fairs and the college's open house, and tutoring students who were having difficulty in our program. Traditionally, one of the difficulties we have faced with the IIC is that our program is so unique that it was difficult to find tutors who were able to assist our students.

The EMT Program's Advisory Board meets annually to discuss the program and obtain information from members on ways we can improve it. The Board consists of our staff, the fire academy coordinator, the Dean, representatives from counseling, the Program Medical Director, area hospital EMS coordinators, the Region III EMS Coordinator, our American Heart Association Training Center representatives, fire EMS officers, public safety, and local private ambulance service representatives and supervisors. The committee meets at least once per year but has met more often in the past if an urgent topic was identified.

A list of members is included in the CRC Chair's complete document.

Overall Student Perceptions of EMT Program

Based on the data received from students, we received high ratings in course convenience and cost, use of objectives, teaching methods, relevance of related courses, clinical experience, career information, instructional methods and support services, facility and equipment.

As we assessed with faculty, we currently do little to assist students who complete each level of our program in obtaining jobs. The different kinds of jobs available to those who obtain certification and licensure are discussed in classes to inform students of the many avenues available to them after training. However, the only employment opportunity information provided is that which we post on our bulletin board and whatever the students come in to contact with while doing clinicals in the pre-hospital and hospital settings. The students also seemed to feel that the instructional materials are costly.

In addition to job postings, the EMT staff provides letters of reference upon request for most students and occasionally we receive phone solicitation regarding one of our students from a prospective employer. Feedback from students who have completed our program overwhelmingly indicates that the vast majority of our students gain employment in the field. Some pursue further education in health care in the fields of nursing, physician assistant, and medical school using their EMT training as a supplement to their knowledge or as a stepping stone to strengthen their foundation in future medical education.

■ Overall Faculty Perceptions of EMT Program

The overall opinion of the program from the adjunct faculty's perspective is quite positive. They felt that the administrators respond to input, the written goals are realistic, course and performance objectives have been developed and are measurable, labor market needs and job performance requirements are assessed, and professional industry standards are used to evaluate and revise the program. We could do a better job with student follow-up. The adaptation of instruction, relevance of supportive courses, coordination with other agencies, and especially our clinical experience and program availability were rated quite highly. Equality, in general, and reasonable accommodations for students with disabilities were rated well. Program advisement, career planning, and employment information were rated highly though students seemed to feel we could do more. Resources were all considered excellent though suggestions were made to improve in the comments areas.

The one area that stood out was the Professional Development opportunities. This is a fairly recent challenge we have had, as have others in the college, since we are required to maintain so many credentials in order to be approved by the State to teach EMS. Faculty recently began to have to pay for training and license renewal that used to be covered by the college as part of professional development. This has been a frequent topic of discussion in staff meeting and the office area.

We have tremendous training facilities and equipment here and it is much appreciated by staff. We also have wonderful support staff members that help the program run more smoothly. There were still suggestions made on how to improve such as a full time secretary and parapro, and another full time faculty member or making the Director/Coordinator position full time. CREST has been a wonderful asset to our training and the students are getting benefits no other program can boast to better prepare them for employment.

**INDIVIDUAL FACULTY SURVEY *
OF
INTERDISCIPLINARY INTERACTIONS**

(if) VIII

The purpose of this survey is to determine the nature and extent of interdisciplinary activities and interactions for our discipline/program

Please support the Review of our discipline/program by responding to the following questions and return this form to: _____ at _____ Campus
by _____
Name
Date

1. Please respond whether the course(s) listed below serve students in your program as:

	Requirement	Support	Elective	No Role
_____ Course	_____	_____	_____	_____
_____ Course	_____	_____	_____	_____
_____ Course	_____	_____	_____	_____
_____ Course	_____	_____	_____	_____

2. To fulfill the needs of the students in your program, these courses:
are working well _____
would benefit from revision _____

Comment:

3. How do these courses contribute to the goals and desired outcomes of your program?

4. Please identify someone from your program who would help our discipline accomplish any revision(s) identified above: _____

* To be sent to all programs that require your course(s).

THERE ARE NO OTHER PROGRAMS THAT REQUIRE OUR COURSES.

COMPARABLE COURSES/PROGRAMS AND TRENDS

Henry Ford Community College, Wayne County Community College, and Macomb Community College all offer EMT programs that comparable to ours. The major differences are in the coordination and support staff. All three have full time coordinators that do not teach and have one or two full time faculty. Some of them exceed our total student number per year, but I do not have information on their success rates and retention of students. The coordinator from WCCC indicated that attrition rates are high due to the number of challenges students seem to have in that geographic area. MCC has had some recent struggles because of a period of rapid growth that they were not prepared for, and not having enough support staff in their program. HFCC seems to be very stable. All three of these colleges have had similar challenges to ours with the change from state to national curriculum. All three offer firefighter/paramedic associate degrees which is one area we are investigating. None of their programs have the nice detailed website we display and this is due to much hard work by the Director and parapro. Our parapro continues to update and maintain ours much better than most other college's websites. Our student numbers have doubled in the past year and we attribute that to our hard-working and dedicated staff, our website, and our growing reputation. We are not that concerned about growth after watching the struggles MCC encountered. Instead, we want to continue to do what were doing, work on improving, and growing at a slow but steady pace.

PROGRAM NEEDS AND RESOURCES

Upon review of our program and discussion with staff, we have come up with some areas that we feel could be improved. The program administration staff works extremely hard and finds little time to do much more than just maintain our current status. There are so many things we would like to do, but so little time/staff in which to do them.

- Our catalog descriptions need to be revised, as do some of the courses in the curriculum. Now that we are much more informed about how to teach the new curriculum, the courses can be better tailored toward student success.
- We would like to have some of our paramedic classes online. There are other areas in the state doing this and we feel that it would fill a real need in the community, especially with the fire departments, not to mention being the first in this area to offer such a program.
- We would like to develop an online medical terminology course to meet a perceived community need. Only having one full time faculty member who teaches most of the EMT courses caused us to delay work on this project. We would like to see the requirement dropped that states only full time faculty can teach online courses.
- A firefighter/paramedic degree option should replace the EST since only five have graduated from this program in seven years. There is not much demand for the EST degree. It was developed with public safety officers in mind who are cross-trained in police, fire, and EMS. Though many of the southern Oakland County police departments are PSOs, a degree requirement is not put in as one of the application requirements. The reason for this is that it would dramatically limit the number of qualified applicants. Most of the Oakland County fire departments have become advanced level EMS providers (paramedics) in the last ten years. There are many reasons for this but some are that we have gotten so good at fire prevention, fires are fewer; and we always have medical emergencies and trauma occurring, community fire departments can provide a quicker response to victims in their own areas than a private service ambulance can.
- Due to the tremendous increase in students and our desire to meet the growing needs of our program, the half-time secretary and half-time parapro positions need to be made full time positions.

Measures	Satisfactory	Needs Improvement	Comments *
I. Current Course Descriptions & Syllabi		✓	Much of this information is outdated. Revisions are included in this document.
II. Course/Program Outcomes	✓		
III. Instructional Methodology	✓		
IV. Staff Development		✓	Reimbursement and support for outside professional development activities would improve this area greatly.
V. Student Retention		✓	We lose many students after Basic EMT that we need to look at more ways to retain them into the advanced program.
VI. Student Recruitment	✓		
VII. Input from the External Community	✓		
VIII. Comparable Courses & Trends	✓		
IX. Interdisciplinary Interactions	✓		
X. Discipline/Program Needs & Resources		✓	More staff or increasing part time to full time.

Recommendations and plans for future curriculum revision (if appropriate) : _____
