

VINEWOOD CHURCH BURNS!

*Oct-30-5 a.m.
1936*

We were saddened to learn of the misfortune of Vinewood in the burning of their building.

Apparently the fire started because of defective wiring. The fireman stated that it likely smouldered for some time before breaking through. The alarm was given sometime early Saturday morning by neighbors.

It seemed that the greater portion of the fire was in the roof and attic; however the auditorium and basement are badly damaged by smoke and water. A hole was chopped in the floor of the main auditorium by fireman. ~~Most of the windows in the building are broken.~~

only attic window broke

As members of the great Brotherhood of Christ we express our deepest sympathy to the members of the Vinewood Church of Christ in the loss of their building.
