### COMMISSIONER-GENERAL OF IMMIGRATION.

TREASURY DEPARTMENT,  
BUREAU OF IMMIGRATION,  
*Washington, D. C., June 30, 1903.*

TREASURY DEPARTMENT,  
Document No. 2330.  
*Commissioner-General of Immigration.*

SIR: Although by the terms of an act to establish the Department of Commerce and Labor, approved February 14, 1903, the Immigration Service was transferred to said Department, such transfer did not take effect until the beginning of the fiscal year 1904, and I accordingly present for your consideration the following report of the operations of the Bureau for the year ending June 30, 1903.

For reasons that will appear in the appropriate place in this report, there have been incorporated into it the reports to the Bureau of certain officers having charge of the administration of the immigration laws at ports whose needs or operations call for special mention; but it is not intended thereby to give the impression that the officers at other ports or places have been any less efficient, or that the duties performed by them, or the accessories required by them in such performance, are any less indispensable to the success of this branch of the Executive Department. As will be shown hereinafter, there is no part or detail of the immigration service which can with impunity be neglected. Its power to accomplish the purpose for which it was organized may, perhaps, best be measured by the work accomplished at its weakest point.

The usual tabulated statements are given below, with appropriate headings indicating the nature of the information shown by the tables, respectively, over which they are placed. In some instances, for the purpose of making it possible to institute a comparison with the figures for the corresponding periods of other years, the latter are given in parallel columns.

Grand total	466,369	182,374	648,743	613,146	243,900	857,046

From the foregoing table it appears that the total steerage immigration for the year was composed of 857,046 souls, an excess over that of last year of 208,303, or 32 per cent. Of these there arrived at—

United States continental ports	804,456
United States insular ports:	
Hawaiian	14,550
Porto Rican	2,120
Canadian ports	35,920
Total	857,046

The above noted increase was made up of additional arrivals at continental ports of this country of 195,574, at insular ports of 6,008, and at ports of Canada of 6,721. Apart from the general increase of immigration the most noticeable feature of the above table is the increase at New Bedford, Mass., from 326 to 3,339, and the decrease at Portland, Me., from 1,634 to 69.

This table shows increase in immigration from all foreign sources, suggesting as the chief cause of the influx of aliens into the United States during the year the inducements offered to settlers here rather than any specially localized causes of discontent in their own countries.

Of the total steerage immigration, there came from Europe 814,507, from Asia 29,966, and from all other sources 12,573. If to these figures are added those representing the total arrivals of alien cabin passengers (64,269), the result will show that, irrespective of those coming from Canada and Mexico, either as residents or citizens of those countries, of whom no record is kept, the total immigration of aliens to the United States during the year aggregated 921,315, or 105,043 more than the greatest number heretofore reported for any one year.

The following statement, made from the data in Table II, is interesting as showing the countries, in groups, from which the steerage immigrants came during the year under consideration and the next preceding year:

While some encouragement may be gained from consideration of the foregoing tabulated statements showing that the ratio of increase in immigration from northern Europe was greatly in excess of that of the increase from southern Europe, yet the fact remains that the great bulk of aliens added to our population during the year just passed came from Austria-Hungary, Italy, and Russia, those three countries alone sending 572,726 of the total number of steerage aliens—more than two-thirds.

An inspection of Table III will show that of the total of 857,046 steerage aliens 613,146 were males and 243,900 were females, of whom 102,431 were less than 14 years of age, 714,053 ranged from 14 to 45, and 40,562 were 45 years old and over. There were of these 3,341 who could read but not write and 185,667 who could neither read nor write, leaving a balance able both to read and write of 668,038. It also appears that 76,702 of these steerage aliens had been in the United States before; that 128,266 of them brought each \$30 in money or more; that 511,302 had each less than \$30, and that the total amount of money shown by them to the officers was \$16,117,513.

As showing the comparative thrift of the races, attention is directed to the fact that the 71,782 Germans brought \$2,480,634, while the 196,117 South Italians had but \$2,159,017; that the 28,451 English brought \$1,405,365, while about the same number of Magyars, 27,124, showed only \$341,401, and the 32,907 Croatians and Slovenians but \$407,117.

Exclusive of those denied admission at the land boundaries of the United States there were rejected altogether 8,769, the causes of which are shown, with the corresponding figures for last year, in the subjoined statement:

	1902.	1903.
• Rejected aliens.		
Idiots	7	1
Insane persons	27	23

Polygamists	0	1
Women for immoral purposes	3	13
Assisted aliens	0	9
Contract laborers	275	1,086
Total	4,974	8,769

The most noteworthy features in this statement are those in relation to the rejections of alien contract laborers and persons suffering with dangerous contagious diseases. With respect to the former, it may fairly be assumed that the extra vigilance of the officers charged with the enforcement of the law has resulted in the detection and exclusion of the large number given, 1,086, which is in excess of the number excluded during any previous fiscal year since the establishment of the Bureau.

As regards the rejection of diseased aliens, I must reiterate the statement made in the last annual report that it exhibits upon the part of some of the transportation lines such a wanton disregard of the laws of the country as fully vindicates the wisdom of Congress in authorizing, by the act approved March 3, 1903, the imposition of a penalty for bringing diseased aliens to this country in those cases in which the existence of the disease was perceptible at the time of foreign embarkation.

Doubtless there are cases in which the transportation lines should not be punished, cases in which the disease may not be observable even after careful inspection by a competent physician. It is needless to say that in such instances, the power to penalize being in a measure discretionary, no fine should be exacted. It is equally beyond question that in other instances the fine should be imposed, for there is no

feature of the system of legislation devised to protect the people of this country from the dangers of an indiscriminate and unrestricted influx of aliens so important, from a physical point of view, as that intended to prevent the introduction of disease. If some of the diseases are obscure, that fact simply emphasizes the need of greater precaution. The transportation lines, in those instances in which a doubt exists as to the nature or fact of disease, has within its own power complete protection from the risk of incurring the penalty by resorting to a refusal to take aliens who are, or may be, afflicted therewith on board their vessels. On the other hand, if a diseased alien is once allowed to embark, neither the healthy aliens on the same vessel nor the people of this country can escape the evil consequences. These views apply, of course, merely to communicable diseases, on account of bringing which alone the fine alluded to may be imposed; but for reasons to be stated hereafter it is, in my judgment, time to exclude all physically defective and diseased aliens, including those who have reached an age when they can not reasonably be expected to support themselves much longer, if at all.

The following statement shows the annual rejections and the causes therefor since the establishment of the Bureau:

This same table also supplies the information for the following statement, which shows the principal races which contributed to the sum total of alien steerage immigrants:

It should be explained, however, that these rejected aliens were not of the arrivals reported in Table I, given in this report, but were a portion of the unnumbered aliens crossing into the United States from foreign contiguous territory.

From Tables IV and V, subjoined, information may be obtained, respectively, of the comparative arrivals, by sex and for each month of the fiscal year, during 1902 and 1903 and of the countries whence the steerage aliens came, as well as the races to which they belong.

In Table VI is given a statement of the total arrival of aliens, both steerage and cabin, at seaports of the United States and Canada, showing the countries from which they came and their sex. As will be observed, the old form of report is still adhered to, by which some sort of distinction is made between cabin and steerage passengers, the latter being classified as "immigrants" and the former as "other alien passengers." As was stated in my last annual report, the distinction is not one of any particular value under any circumstances, particularly as the recent act regulating immigration applies in terms to all "aliens" regardless of the actual or professed intent of such persons with respect to the duration of their stay or the object of their coming. The total reported immigration of aliens to this country, therefore, is, as shown in the last column of the next table, 921,315 for the year 1903.
