SUGGESTED LIST OF BTYPES

Btypes are 7 character codes for the type of borrower in the patron file. Each different set of borrower privileges has a different btype. It is recommended that the first two characters of the btype code reflect the institution. The next four characters are the type of borrower, and the final character may be locally defined.

Btypes work with Itypes to determine the circulation rules for any particular person checking out any particular thing

Borrower statistics are based on Bstats that another group is analyzing.

In preparing this list, we are attempting to group similar categories together.

CODE	NAME
admi	administration/administrator
afil	affiliate
alum	alumni
bind	bindery
carr	carrell
cbor	community borrower
clnt	client
comp	company
cust	customer
data	database sign-on only
depo	deposit
dept	department
dmcc	DMC Corporation
empl	employee
exte	extension
facu	faculty
fenr	fee, non-resident
gest	guest borrower
iill	interlibrary loan
ille	interlibrary loan (external)
illi	interlibrary loan (internal)
intl	internal charge (within the library)
ipas	info pass
intm	medical intern
mucs	Macomb University Center Student (last letter for home institution?)

pati	inpatient
pato	outpatient
phys	physician
mich	Michigan resident (limited DPL privileges)
micd	Michicard holder
nurs	nurse
resm	medical resident
resa	resident adult borrower
resb	resident borrower
resj	resident juvenile borrower
resu	university resident
nona	non resident adult
nonj	non resident juvenile
recp	reciprocal
reg1	administrator/attending physician
reg2	medical resident/nursing/employee
resl	research loan
stud	student
stug	graduate student
stum	medical student
stun	student nurse
staf	staff
teas	teaching assistant
