

SPECIAL POST GRADUATE WORK IN THE FIELD OF MISSIONS

- Courses are listed below.
- These courses are designed for post graduate study or for those who have been on the mission field or who have completed other academic studies and are making special preparation to enter the mission field soon.
- The teachers teaching these courses will be men who have had rather extensive experience on the mission fields. It is planned to have qualified, representative teachers who have worked in Europe, Asia and Africa.
- French, German, Spanish, Ukrainian and Greek will be taught. Other languages will be added as there is opportunity.
- A film, as well as a written Library, will be developed at North Central. We plan to make films on many nations and make them available to congregations and various groups of interested people. It is planned to keep this library up-to-date at all times.
- Many returning missionaries will be invited to visit North Central and lecture as well as give personal counsel to students.
