

**Website Mission Statement**  
As amended at meeting on 8/9/2000

The DALNET website serves as a gateway to Southeast Michigan resources. It provides access to all DALNET resources including local subject guides, links to all DALNET libraries and catalogs as well electronic databases and worldwide information resources. The website provides promotional information for the consortium and physical accessibility to the collections through maps, phone numbers and hours. It also acts as an intranet for DALNET member institutions.

DALNET uses the most current technology to provide web access to the members' vast collections providing quality searching to all DALNET users. The design enables searching success for many different learning styles.
