OCC Graduates' Program of Study at Their Transfer Institution

Introduction

OCC graduates who continue their education at four-year institutions are pursuing their studies in myriad disciplines. Overall, there is a great deal of correspondence between a student's Program of Study at OCC, and their major at their eventual four-year institution. For example, many OCC Business Administration degree holders major in accounting, finance, and business administration while pursuing their bachelor's degree. This report contains information specifying the OCC Program of Study and what the graduate is now majoring in at their current school.

Report Format

The report contains information in a tabular format. In the first table, listed on each page are columns first for OCC Program of Study and then their Major after OCC. This report includes data from 1996/97 OCC Graduates and August & December 1997 Graduates. If there were no graduates in a particular OCC Program for the period covered by this report, that program is not listed on the table. The second table contains the identical information as the first, but with a different sort rule. Major after OCC is first presented, and then OCC Program of Study is listed.

Observations

- ▶ Overall, majors selected by OCC graduates mirror closely the program of study in which they received a degree or certificate.
- ▶ This correspondence is especially true as the program of study becomes more specialized. For example, those people who graduated from the criminal justice program are pursuing their degrees in Criminal Justice, Law Enforcement, Sociology, and other majors applicable to the Police/Law enforcement area. Graduates from the CAD Program with the Auto Design Option are pursuing studies in engineering and computer-aided design.
- ▶ Those students who graduated with General Studies or Liberal Arts degrees are now enrolled in a large array of majors ranging from Business to Pre-law to Psychology and English. These programs enable students to opt for a wide range majors for their post-OCC education.
- ▶ It is important to note that this report is generated from the OCC Graduate Follow-up Survey and is based on the self-reported data given by our graduates. With an average completion rate of 60% for the survey, conclusions based on its data are likely reliable. The GFS does not, however, provide information for every relevant group at OCC. One of the limitations of this report is the fact that there is no information about students who do not complete a degree or certificate at OCC. These individuals may have gone on to transfer, but there is no existing mechanism to track these former students.
