Oakland Community College 2007 Institutional Dashboard Report

Introduction

The annual Oakland Community College Institutional Dashboard report reflects the extent to which the organization is achieving its Purposes and Strategic Goals. Additionally, the Institutional Dashboard provides an integrated approach to collecting and presenting information which monitor critical issues that directly impact long and short term planning.

The dashboard consists of a broad set of 115 measures which, when considered collectively, provide an objective perspective on the overall performance of the organization. As a result, we are able to determine the extent to which our initiatives, projects and resource allocations support the enhanced attainment of our Goals and Purposes. The relative impact of our efforts can be reasonably determined since over the past four years the definition of each measure, as well as the method of data collection, has remained consistent.

Throughout this report, individual measures are displayed with colors to portray areas of excellence (green), satisfactory performance (black), and areas of concern (red). The annual Institutional Dashboard report serves a variety of purposes including:

- · A tool for better understanding the college.
- A process to promote strategic thinking.
- A tool for aligning long and short-term planning and budgeting priorities at the College, Campus and Departmental level.
- A means of establishing annual priorities and emphasis for college-wide and campus based councils and committees.
- A base of information for annual Initiatives.
- An information resource that can be incorporated into departmental as well as individual Goals and Objectives.
- An early warning system which highlights what is most alarming.

During 2004-05, the Institutional Dashboard underwent a detailed review by Chancellor's Cabinet. Based on this review, modifications were made and implemented prior to the preparation of the 2005 report. The 2007 report is based on the exact same set of measures, weights and associated benchmarks used in the 2005 report. As a result, comparative analysis between the 2005, 2006 and 2007 reports can be delineated. Critical to this process is a careful consideration of the specific actions the College has taken to positively impact each Goal and Purpose, the actions currently underway, and the steps the College can/should take in order to attain yet higher levels of success in the future.
